Once a common sight in our towns and cities, microcars were ingenious solutions to the post-war demand for economical and accessible motoring. Nowadays they are making a celebrated comeback with all of the big car manufacturers featuring at least one flagship small car, from DaimlerChrysler's Smart and BMW's Mini to Nissan's Micra. But what are the factors, now and then, that turned the microcar into a viable alternative to the 'normal' car? How have the aspirations and ideas behind the microcar changed over the decades? The cars themselves have undoubtedly undergone a radical transformation. Whereas

the current trend in small cars is led by environmental concerns, the first phase of the microcar phenomenon was determined by economic necessity: many manufacturers of planes, trains, and white goods had to re-invent themselves as producers of automobiles. The result was a proliferation of small, cheap and extraordinary-looking three- and four-wheeled vehicles. This book looks at the social and cultural conditions behind the rise, the fall and the ultimate resurrection of the small car, and features some of the most fascinating and best-loved examples. With the debate over transport, sustainability, congestion, fuel consumption, taxation and the environment high on the agenda, there has

never been a better time than now to examine the role of the microcar.

Pedro, a 1969 VW Beetle, was happily enjoying his retirement in the Californian sunshine when his world was turned upside down. He was sold to Fiona, an English woman, and shipped across the Atlantic. His

travels wouldn't end here though; on arrival in the UK he received modifications and preparation for the longest journey of his life so far, over land to Singapore. Joining him on his travels were his English driver Fiona and American non-driver, Rica. Mechanical gremlins struck on day one; how on earth would they make it 22,000 miles across deserts, rivers, mudslides and mountains if they couldn't even get out of the country without breaking down! Sometimes funny, sometimes scary; thought provoking and emotional but always entertaining. Fiona tells the tale of an incredible journey in a car that is fast becoming a legend.

The four terrorist bombs that exploded in London on 7 July 2005 killed 56 people, including the bombers, and injured more than 700. This narrative summarises what

the police, intelligence and security agencies have so far discovered about the bombers and how and why they came to do what they did. The first section details what is known of the bombers' movements on the day, from CCTV and witness accounts. The immediate aftermath is then described, looking at the police and intelligence effort and the Government response until the identification of the four bombers, Shehzad Tanweer, Mohammad Sidique Khan, Hasib Hussain and Jermaine Lindsay. The next section examines why the four men became suicide bombers. The backgrounds of the four men appear largely unexceptional, and there is little to mark them out as particularly vulnerable to radicalisation. Khan, Tanweer and Hussain were apparently well integrated into British society. Lindsay appears to have had more instability at various points in his life, but not exceptionally so. A common factor for Khan, Tanweer and Hussain was the social life around the mosques, youth clubs, gyms and Islamic bookshop in Beeston on the outskirts of Leeds, and group bonding through outdoor activities. Khan was a leading figure here, and Tanweer and Hussain became close to him.

Lindsay was the outsider of the group: he converted to Islam in 2000, and it is believed that he was strongly influenced by an extremist preacher, and met Khan when he lived in the Huddersfield area. Their motivation appears to be typical of similar cases: fierce antagonism to perceived injustices by the West against Muslims and a desire for martyrdom. The next section examines visits abroad, especially to Pakistan, and possible contact with Al Qaida figures. Annexes cover: the evolution of Al Qaida and its associated groups; radicalisation in context; timeline of the evolution of the terrorist threat; timeline of the four individuals. The report concludes that there is still much more to be discovered about how the group were radicalised, how the bombings were planned and executed and whether others were involved.
