According to the Chinese zodiac, 2018 was the year of the 'earthly dog'. In the middle of the long, hot, and feverish dog days of the summer of 2018, some workers at Shenzhen Jasic Technology took their chances and attempted to form an independent union. While this action was met by the harshest repression, it also led to extraordinary demonstrations of solidarity from small groups of radical students from all over the country, which in turn were immediately and severely suppressed. China's year of the dog was also imbued with the spirit of another canine, Cerberus—the three-headed hound of Hades—with the ravenous advance of the surveillance state and the increasing securitisation of Chinese society, starting from the northwestern region of Xinjiang. This Yearbook traces these latest developments in Chinese society through a collection of 50 original essays on labour, civil society, and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

In Alison Kent's brand-new novel set in Miami's sultry South Beach, Finn finds a woman who can melt his ice-cool exterior with one look, and a case that could land them both in hot water. . . Finn McLain is no stranger to unusual assignments. But the gorgeous stranger who just asked him to photograph her for an erotic art exhibit--that's definitely a first. Finn came to Miami to dig into the personal life of boutique manager Roland Green for a lovesick gallery owner, and hadn't planned on sticking around. But the boutique's owner, Olivia Hammond, has just made him a proposal that's as hard to ignore as Olivia herself. She's got caramel-kissed skin, a body that makes grown men tremble, and a wild sideline as an exhibitionist. Ooookay. Yet despite her willingness to "let people look," Finn's convinced there's a hell of a lot Olivia's not revealing. And that's the most intriguing prospect of all. . . Olivia has never been shy about using her sexuality to get what she wants. But then, she's never wanted a man quite the way she wants Finn. What he thinks about her shouldn't matter, yet it does. Through every candid photograph and every heated encounter, Finn is getting closer, intent on getting beneath her shell--and for once, Olivia is tempted to let him. But first they have to contend with the fact that Finn's simple investigation into Roland Green is getting dangerously complicated. . .and Olivia isn't the only person in town who's not what she claims to be. In a city throb-

bing with sex appeal, two wary lovers are about to play the ultimate game of show and tell, where temptation is raw, wild, and hot enough to make you sizzle. . . ". . .sizzles and thrills, with characters so sexy they scorch the pages!" --Tess Gerritsen

This textbook provides a comprehensive introduction to the political systems of all ASEAN countries and Timor-Leste from a comparative perspective. It investigates the political institutions, actors and processes in eleven states, covering democracies as well as autocratic regimes. Each country study includes an analysis of the current system of governance, the party and electoral system, and an assessment of the state, its legal system and administrative bodies. Students of political science and regional studies will also learn about processes of democratic transition and autocratic persistence, as well as how civil society and the media influence the political culture in each country.

The definitive, easy to understand and breakthrough guide on how young people can take their limited first income and turn it into a small fortune by the time they turn thirty from an expert financial planner. Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

As the ongoing Asian crises underscore, policymaking and policies are becoming less the exclusive purview of governments and more the outcome of a complex process in which diverse groups participate actively, with varying degrees of influence. A commercial power center (CPC) is any group, combination, or coalition that seeks to influence the design and implementation of government economic policies to suit its interests. This analytic framework is used to assess the changing politics of economic policymaking--to identify new groups with stakes and older ones that may be losing influence, and to evaluate their interaction in the making of government policy. The influence of selected CPCs in emerging markets matters for both what analysts look at and how they view those new targets. Asia's financial crisis, which struck as this project was in its final stages, drove home that lesson. The authors illustrate their methodology by examining four countries--Mexico, Turkey, China, and Indonesia--that are in transition and that vary widely from one another.

The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years.The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

According to the Chinese zodiac, 2017 was the year of the 'fire rooster', an animal often associated with the mythical fenghuang, a magnificently beautiful bird whose appearance is believed to mark the beginning of a new era of peaceful flourishing. Considering the auspicious symbolism surrounding the fenghuang, it is fitting that on 18 October 2017, President Xi Jinping took to the stage of the Nineteenth Party Congress to proclaim the beginning of a 'new era' for Chinese socialism. However, in spite of such ecumenical proclamations, it became immediately evident that not all in China would be welcome to reap the rewards promised by the authorities. Migrant workers, for one, remain disposable. Lawyers, activists and even ordinary citizens who dare to express critical views also hardly find a place in Xi's brave new world. This Yearbook traces the stark new 'gilded age' inau-

gured by the Chinese Communist Party. It does so through a collection of more than 40 original essays on labour, civil society and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

This two-volume book presents outcomes of the 7th International Conference on Soft Computing for Problem Solving, SocProS 2017. This conference is a joint technical collaboration between the Soft Computing Research Society, Liverpool Hope University (UK), the Indian Institute of Technology Roorkee, the South Asian University New Delhi and the National Institute of Technology Silchar, and brings together researchers, engineers and practitioners to discuss thought-provoking developments and challenges in order to select potential future directions. The book presents the latest advances and innovations in the interdisciplinary areas of soft computing, including original research papers in the areas including, but not limited to, algorithms (artificial immune systems, artificial neural networks, genetic algorithms, genetic programming, and particle swarm optimization) and applications (control systems, data mining and clustering, finance, weather forecasting, game theory, business and forecasting applications). It is a valuable resource for both young and experienced researchers dealing with complex and intricate real-world problems for which finding a solution by traditional methods is a difficult task.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students,

and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

This book teaches medical coding for anesthesia and pain management. It will prepare the reader for passing the Certified Anesthesia and Pain Management Coder (CANPC) exam as well as improving their professional practice. The book goes beyond the concepts and applications that are required to pass the exam. It provides critical insights into actual scenarios faced by coders in the real world. 70 unique cases are presented that will highlight the correct coding method. These give the reader practice in applying principles to actual patient cases. The author's unique formula allows the reader to arrive at the best coding decision for the most complex patients. Each case is discussed from a clinical viewpoint to explain the coding rationale. This book is both an invaluable asset for anyone working towards a CANPC exam but also serves as a useful reference for those currently holding the certificate.
