Aqua Rite (GoldLine) Operating Manual. ... The Aqua Rite automatically sanitizes your pool by converting the salt into free chlorine which kills bacteria and algae in the pool. ... Alternate between the chlorine generator and using the chlorine tablets to help regulate cyanuric acid levels.

Aqua Rite has stopped generating chlorine. A flashing LED indicates a 15-60 second time delay period. CHECK SALT When flashing, the salt level is low (below 2700 ppm) and Aqua Rite is generating at low efficiency. When illuminated steady, the salt level is too low and Aqua Rite has shut down. Page 10 4. Push the Diagnostic button to exit.

1 14 OPERATION The Aqua Rite ® is an automatic chlorine genera-

tion system for pool or spa sanitation. The operation requires a low concentration of salt (sodium chloride) in the pool water. These levels are low enough that it normally will not be tasted.

As pool water containing salt passes through the chlorine generator cell an electrical charge, generated by the power center, is applied to the electrolytic plates creating a current flow. This causes a chemical reaction that releases chlorine gas, which dissolves into the water.

How To Troubleshoot a Hayward Aqua Rite - INYOPools.com

Sense and Dispense consists of two kits. The first kit senses pH and chlorine levels and dispenses a self-renewing supply of chlorine generated from salt. pH dispense can be achieved using the second kit, which includes a manifold that connects to a CO2 tank or an carbonic acid feeding tank.

Step 1: Adjusting Salinity (Salt) level. Before the chlorine generator can be calibrated correctly, the salinity—or salt level in the pool water—will need to be at the correct level. For these systems, it should ideally be between 3200-3600 ppm (parts per million). This can be tested using a salt test meter or salt test strips.

I just purchased a home with an Aqua Rite Goldline system that has a T-15 cell. The previous owner said the salt system was functional but he had turned it off and had been using Chlorine. I decide to go sal again. I added salt, checking the water with a salinity test strip until I got to 3100ppm.
