HAMMOND ROMAN

The all-in-one compact compressed air package. Compressed air systems (*) of the SXC series have been designed by Kaeser for trades and crafts. On only 0.62 m², they comprise all components necessary for air supply under a single strong polyethylene cover: a rotary screw compressor with SIGMA-Profile, a refrigeration dryer and an air receiver.

Whether they are run as stand-alone units or grouped together: Our large compressors deliver top-quality compressed air with maximum availability - because they are designed for continuous operation. With state-of-the-art motor and control technologies, these compressors are extremely economical to run and very easy on the environment.

Reciprocating compressors - KAESER KOMPRESSOREN PTE LTD

A quiet air compressor allows you to place your compressor in your shop without having to create a separate space for it. Since all components are combined in one pre-assembled package, installation is also very simple. Our air compressor packages are available in 3 to 40 hp sizes in many configurations.

Water, oil, dust: Kaeser offers a complete product portfolio for combating the enemies of your compressed air application - one which makes no compromises when it comes to dry and pure air - from straightforward construction site use to highly complex electronics production: for high product quality; for faultless and low-maintenance processes; for regular sewage system disposal of your ...

From performance analysis and compressor system design to 24/7 emergency service - the professionals at the global Kaeser Service network ensure that you get the very best from your compressed air station at all times. We look forward to hearing from

you - and that includes our many available trade show meetings.
